

Tap into a More Powerful RateStar with New **RateStar Buydown**

The industry's leader in MI risk-based pricing solution features a unique new tool for loan officers: **RateStar BuydownSM**

An industry first, RateStar Buydown is similar to a rate buydown and allows you to customize your borrower's MI premium to an exact dollar amount. MI Buydown also ensures that you use all available lender and seller credits to get the lowest MI premium possible.

The easy tap-and-touch technology puts you in control to create different combinations of upfront and monthly payments to arrive at the perfect solution for cost-conscious borrowers.

RateStar Buydown offers the ultimate flexibility for your business:

- MI Buydown allows the use of lender and/or seller credits, and borrower funds.
- Lower premium payments mean more loans can meet debt-to-income requirements.
- Works with Arch MI's Standard and EZ Monthly plans, and Arch Mortgage Guaranty Company (AMGC) products.
- Guarantees our most competitive rates for your borrower's loan.

Stand out from the competition with a real point of difference – the MI Buydown. Use RateStar Buydown to close more loans and collect more referrals.
